## Overview

Cemp is a leading manufacturer of electric motors for the global industrial market specialising in motors for Hazardous Atmospheres. Its motors can operate in hostile environments throughout the world on offshore oil & gas rigs, production platforms, onshore terminals, refineries, chemical works and coal mines safely and efficiently delivering power with minimal attention over long periods.

From Oil refineries in Qatar to water treatment facilities in Kazakhstan to offshore platforms in the North Sea coupled with our close relationship with many of the main specifies and engineering contracting companies gives testimony to our expertise and reputation for the products and services we provide.

<b>Range</b>	0,12 kW to 200 kW, up to 1000 Volts Single & three phase, construction in aluminium, and cast iron, Enclosures Ex-d, Ex-de, Ex-n and Ex-e Compliant to all leading End Users specifications, e.g. Shell, Exxon Mobil, Total
<b>Organisation</b>	Cemp's headquarters and main manufacturing facilities are in Milan, Italy with others in Northern France. Turnover last year was € 28M, with 50,000 units produced, staff 100 people plus approximately 100 people as sub-suppliers with strong-tie relationship
<b>Sales Companies</b>	Italy, France, Germany, Singapore, other international business supported though distribution and agency network
<b>Projects Department</b>	Specialist department tailored to suit the high demands and expectations placed on us by end users and engineering contracting companies. This service extends to provide: <ul style="list-style-type: none"><li>• Pre-contract advice and consultancy</li><li>• Tenders, proposals</li><li>• Order management, including documentation &amp; control</li><li>• Scheduling, testing and distribution of motors</li><li>• Technical &amp; commercial, throughout the process</li><li>• On Sight back up and support</li></ul> Approved service providers for ongoing continual support to end user wherever the location
<b>Quality Assurance</b>	With its state of the art flexible manufacturing facilities all motors receive rigorous inspection throughout their production processes to ensure compliance to strict engineering tolerances and compliance to project specification. All facilities are accredited with ISO 9001 documented quality systems.
<b>Reference List</b>	In our fifty year history we have supplied over 1 Million motors to many prestigious clients, we can provide a detailed reference list if required
<b>Web Site</b>	Further details of the company may be found on <a href="http://www.cemp.eu">www.cemp.eu</a>
